Unit 05 : Card Production (Continue...) [MAMEU05]

DebCard, a card manufacturing company, produces two types of cards: Gold and Platinum. At the end of the daily production, the Quality Control (QC) department ensures that defective cards are removed.

The following table shows the average number of cards of each type that are produced per day, and the average percentage of defective cards per day.

Card Type	Average number of cards produced per day	Average percentage of defective cards per day
Gold	8000	4%
Platinum	12000	3%

Classes 7-8

Question 18:[Q04] Three statements about the daily production of cards at *DebCard* are given below. Are these statements valid?

Circle "Yes" or "No" for each statement.

Statement	Is the statement correct?
(i) Two-thirds of the cards produced daily are Gold cards.	Yes/No
(ii) For every 100 Platinum cards produced, exactly 3 cards will be defective.	Yes/No
(iii) If a Gold card is chosen at random from the daily production for testing, the probability that it will be defective is $\frac{1}{25}$.	Yes/No

Question 19:[Q05] The Quality Control department personnel claim that:

"On average, more Gold cards are defective than Platinum cards every day."

Decide whether or not their claim is correct. Give a mathematical argument to support your answer.

Question 20:[Q06] Another company, *CredCard*, also produces Gold and Platinum cards. At the end of the daily production runs, *CredCard* cards are tested and the defective ones are removed.

The tables below compare the average number of cards of each type that are made per day, and the average percentage of defective cards per day, for the two companies.

Company	Average number of Gold cards produced per day	Average percentage of defective cards per day
<i>DebCard</i>	8000	4%
<i>CredCard</i>	9000	5%

Company	Average number of Platinum cards produced per day	Average percentage of defective cards per day
<i>DebCard</i>	12000	3%
<i>CredCard</i>	4000	4%

Which of the two companies produce fewer defective cards per day? Show your calculations using the data in the tables above.

Question 13: [Q03] Find the numbers of singles, 4's and 6's scored by the batsman?

Question 14: [Q04] What will be the least number of balls the batsman has to strike to complete his century?

- A. 2
- B. 3
- C. 4
